

## All-in-One Secure Data & System Protection and Recovery & No Ransom Ransomware Solution

**STASH® IS A PATENTED ALL-IN-ONE ZERO TRUST DATA MANAGEMENT SYSTEM**

**STASH® provides secure creation of, access to, and sharing of unstructured data for enterprise teams and external partners. It provides secure interactive access to, secure long-term preservation of, & access control of data, plus system protection & recovery with auditing and reporting, and document management features. A distinct revolution to a level of protection previously unobtainable.**

[www.stash.global](http://www.stash.global)

**PROACTIVELY PROTECTS DATA & THE SYSTEM THAT RUNS IT BY PROTECTING BOTH PROACTIVELY.**

**GRANULAR CONTROL OF DATA ON-CLOUD OR OFF. SECURITY STAYS WITH DATA**

**ONE-CLICK RANSOMWARE RECOVERY: MITIGATES THE ATTACK (DATA CORRUPTION) AND THE ATTACKER (EXPLOITATION & RANSOM)**

### ***Immediate***

- Swift, no integration, low friction deployment on-cloud or, off-cloud servers
- Turnkey autonomous business as usual UX - no workflow changes
- Data and System resilience
- Agnostic: Amplifies or replaces legacy systems & tools
- Company controls, no access by STASH or anyone else
- Automatic persistent protection to sensitive data inside & outside of the Organization

### ***On-going***

- Minimize low-value tactics, re-invest resources in proactive security solution
- 1-Click No Ransom Ransomware Protection & Recovery Solution Restore data & system in real-time by date, time, versions. Pay no ransom
- Eliminate time-to-detection, time-to-remediation security risks & costs
- Reduces \$ loss expectancy from data compromise to statistically improbable odds
- Privacy & security stays with the data wherever it is or goes
- Granular control of data inside & outside of organizations
- Create secure/private workflows for seamless sharing of protected data
- Minimize data security TCO by 10-80% (with dependencies)
- SAAS or custom application via API for providers and administrators

### ***Always***

Finally, Breaches Don't Matter.

## KEYS-ON-THE-FLY®

- \*Quantum Resistant
- \*Privacy

## DIGITALCONFETTI®

- \*SA & Cloud Deployments

## ENCRYPTION

- \*Military Grade
- \*Existing Customer Algorithm Support

## NO RANSOM RANSOMWARE SOLUTION

- \*No Extortion
- \*No Ransom
- \*No Data Access
- \*One-click Data Recovery
- \*System Restoration

## SERVICE-BASED & MODULAR

- \*API, PaaS, SaaS
- \*Extensible

## DRM & DLP

- \*User Trust
- \*Privacy
- \*Access Tracking & Alerts

## EDGE, VAULT, & REDUNDANT STORAGE

- \*Data-byte level protection
- \*Multiple Logistical Resilience

## DASH

- \*View only timed sharing
- \*File stays in vault

## GHOSTFILES™

- \*Create & Edit Securely
- \*Real-time protection of open in-use documents at endpoints

## INTELLIGENT CONTROL

- \*Granular Access
- \*Autonomous
- \*Admin-Only

## 5G SPEED & ML

- \*Identity
- \*Authentication
- \*Authorization
- \*Lighter Lift/Faster

**Patented. Zero Trust. Autonomous. Self-Healing. Quantum-resistant. Proactive. Modular. Universally Agnostic. No User Dependencies.**
